- Available on site and remotely.
- Doesn't require logging into local networks.
- Offers improved remote access.

# How to access remotely

Login screen will only appear if you click on subscribed content.

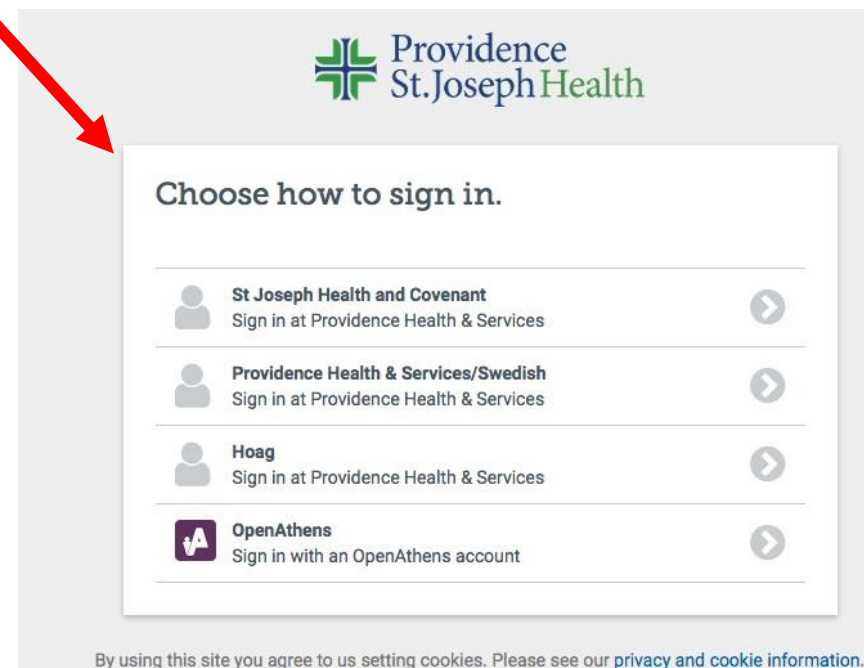

- Most commonly a Find Your Organization box pops up (below left). To login follow instructions below.
- Sometimes applications bypass that step and go directly to the **Choose How to Sign in** box. Select the institution and log in as above.
- If a PING or Okta box comes up instead, just log in with your PJSH credentials.

Click on  
Find Your Organization  
and select  
Providence St. Joseph  
Health.

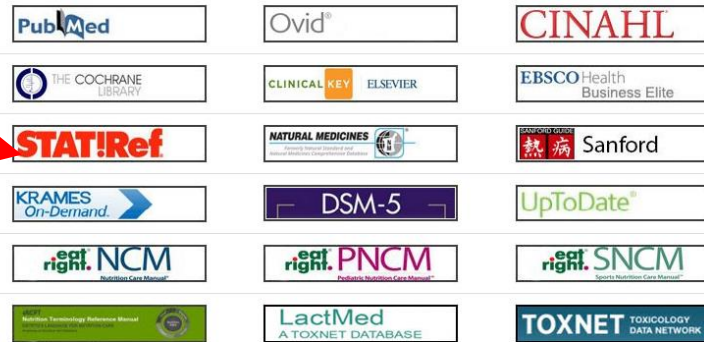

Select your legacy  
institution and log in  
with your local  
credentials (e.g. Okta,  
Epic, network UN/PW).

University of  
Providence non-PSJH  
students and faculty  
select OpenAthens.

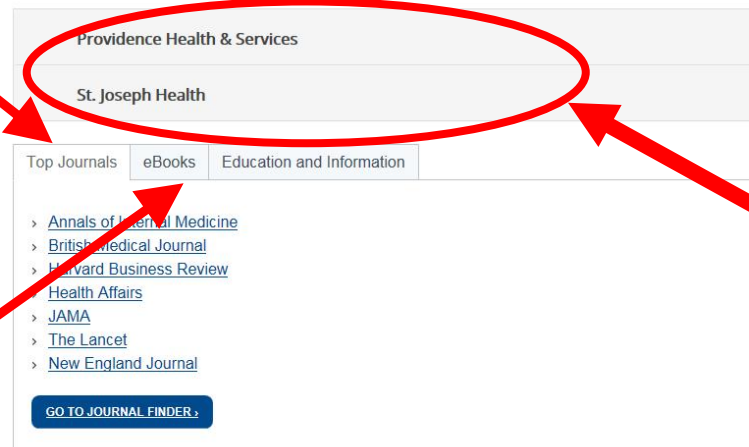

Search anything!

# Digital Commons – Institutional Repository

The screenshot shows the homepage of the Providence St. Joseph Health Digital Commons. At the top left is the Providence St. Joseph Health logo. To its right is the text "Providence St. Joseph Health Digital Commons". Below this is a navigation bar with links for "Home", "About", "FAQ", and "My Account". The main content area features a large banner image of a person in a red shirt holding a magnifying glass over a human figure, with the text "Orthopedic and Sports Medicine Institute" overlaid. Below the banner is a section titled "Browse Research and Scholarship" with a "Follow" button and three bullet points: "Research unit, institute, or department", "Expert Gallery", and "Nursing – New Knowledge, Innovation, Improvement". Below these is a paragraph stating that the repository is a service of the Providence St. Joseph Health System Library Services. To the right of the main content is a blue sidebar with sections for "Browse" (Collections, Disciplines, Authors), "Search" (Enter search terms, Search button, dropdown menu), "Advanced Search", "Notify me via email or RSS", "Author Corner" (Author FAQ, Submit Research), and "Paper of the Day" (A systematic approach to quantifying infection prevention staffing and coverage needs, Rebecca Bartles, Angela Dickson, et al.). At the bottom left, there are sections for "At a Glance" (Top 10 Downloads, All time, Recent Additions, 20 most recent additions) and "Paper of the Day".

An institutional repository for collecting published articles, book chapters, posters, presentations, images, videos, data sets, and more. A place for nursing new knowledge!

One convenient place for all of the new knowledge created by PSJH caregivers.

Digital Commons aims to activate the voice of PSJH and share our research accomplishments as a world-class research organization.

- Searchable and organized by Clinical Institute and Discipline/Department
- Links to PubMed record & available full-text
- Include links/downloads to PPT slides, posters, other multimedia

**Selected Works of Elizabeth Schenk, PhD, MHI, RN**  
 Nurse Scientist and Sustainability Coordinator  
 Elizabeth Schenk is nurse scientist for Providence St. Patrick Hospital, leads nursing Research for Providence St. Joseph Health, a 50-hospital system, and is an Assistant Research Professor at Washington State University.  
 Dr. Schenk's primary research interest is the environmental impacts of healthcare, which she has been working to reduce for over 25 years. As a nurse, she sees the many tons of waste produced at the bedside, the constant high-intensity use of energy. [read more](#)

[Link](#) **Perspectives on Patient and Family Engagement With Reduction in Harm: The Forgotten Voice.** (Elizabeth C Schenk, Ruth A Bryant, Catherine R Van Son, et al.)  
*Journal of nursing care quality* (2018)  
 BACKGROUND: Despite continued efforts to improve safety in hospitals, hospital-acquired harm persists. Strategies have been identified to establish patient-centered care and improve

# Looking for information? Where to look?

- Looking for evidence? Use a database (start with MEDLINE):
  - PubMed or Ovid MEDLINE – more than 27 million references in medicine, nursing, public and allied health, includes Cochrane
  - Cochrane – home of the systematic reviews (searchable in MEDLINE and CINAHL)
  - CINAHL – 3.8 million references in nursing and allied health
- Looking for background information?
  - UpToDate
  - ClinicalKey
  - Textbooks (electronic)
- Looking for that one perfect article?
  - PubMed using keywords
  - Library super search box
  - Google Scholar (linked to library holdings)

- › [R2Library](#)
- › [STATRef](#)

# How to look?

- Start with a focused topic
- Develop your PICO/T
- Identify keywords/subject headings you want to search and plan how you are going to connect the terms
- Search each keywords/subject separately
- Use filters and limits to narrow your search

# PICO(T) Refresher

P

- Population or problem

I

- Intervention or interest

C

- Comparator

O

- Outcome

(T)

- Time

# Search techniques – subject Headings vs Keywords

- Subject Headings:
  - standardized set of terms used to index articles and books, for example
  - MeSH – Medical Subject Headings
- Keywords:
  - words from a title, abstract, etc.

# Subject heading vs keywords - pros & cons

## Subject Headings

### Pros:

- More precise, fewer irrelevant results
- Don't need to think of synonyms

### Cons:

- Need to know the exact word or phrase used in the database or catalog you're using. No guessing!
- Only looks for the term in the subject field
- Subject heading may not exist
- Human indexing is imperfect

## Keywords

### Pros:

- Looks for words in many places in the record
- Don't need to know specialized language/terms
- Larger number of results

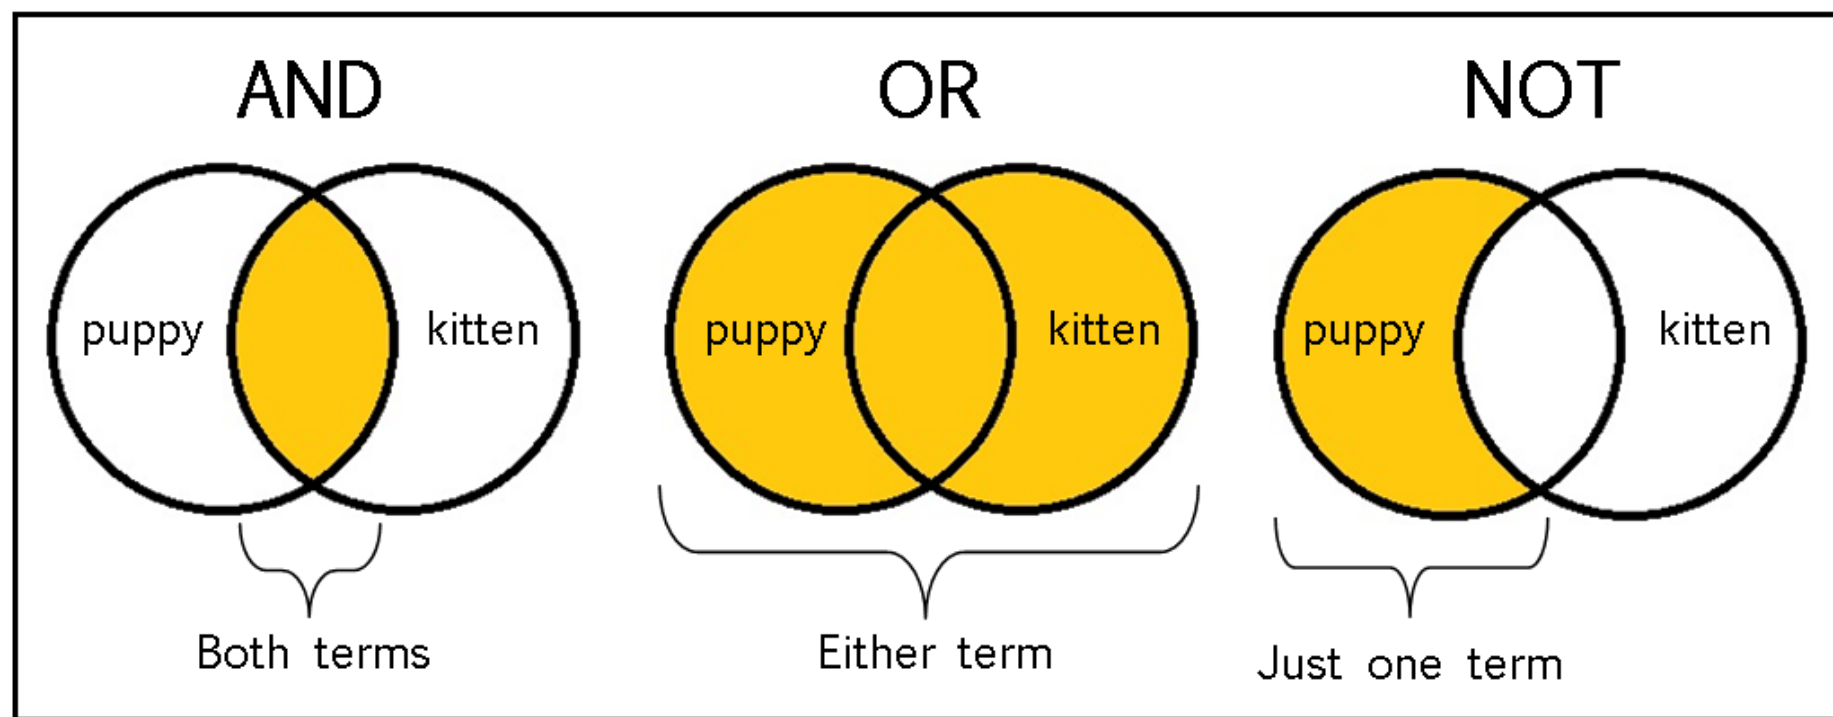

### Cons:

- Have to think of all synonyms
- May get too many results; more irrelevant hits
- Can't be sure you've gotten all the results on your topic

# Organizing Your Search

- Search each concept separately
- Combine your terms using AND/OR (Boolean operators):
  - **AND** – narrows the search; finds articles that include both terms, e.g. *pressure ulcers AND inpatients*
  - **OR** – broadens the search; finds articles that include each of the terms. **OR** is often used to combine different terms that describe the same concept, e.g. *bedsores OR pressure ulcers OR bed sore OR bed sores OR bed sore OR decubitus*
  - **NOT** – narrows the search; finds articles that exclude one term, but will exclude ALL articles with that word. Use with caution!
- Use limiters and filters (article type – *e.g. Systematic Reviews*, years, language) to narrow down your search.

# How it works

<http://www.library.ohiou.edu/2013/11/research-tips-how-i-search-for-information/>

Want to see AND in action? Check out <https://pubvenn.appspot.com/about.html>

# Putting it all together

PICOT:

What are the best interventions to prevent pressure ulcers in hospitalized patients?

- Population – inpatients/hospitalized patients
- Intervention – interventions to prevent pressure ulcers
- Comparator – none
- Outcome – prevention of pressure ulcers
- Time – while patient hospitalized

# Search using Subject Headings (MeSH)

## Subject Headings:

pressure ulcer/prevention and control[Mesh]

**AND**

Hospitalization[Mesh] **OR** Inpatients[Mesh] **OR** Hospitals[MeSH]

## In PubMed you can type it like this:

("Pressure Ulcer/prevention and control"[Mesh]) AND ("Hospitalization"[Mesh]) OR "Inpatients"[Mesh] OR "Hospitals"[Mesh])

# Search using Keywords

## Keywords:

pressure ulcers **OR** pressure ulcer **OR** bedsores **OR** bedsore **OR** bed sore **OR** bed sores

**AND**

inpatient OR inpatient OR hospitalized

**AND**

prevent OR prevention OR prophylaxis

## In PubMed you can type it like this:

(pressure ulcers OR pressure ulcer OR bedsores OR bedsore OR bed sore OR bed sores) AND (inpatient OR inpatient OR hospitalized) AND (prevent OR prevention OR prophylaxis)

# Focus it

Narrow down your search by:

- Language,
- Publication years,
- Article type – e.g. randomized controlled trial, systematic review, meta-analysis
- Population age – child, infant, adult, aged, etc.

# Need a quick refresher – find the tutorials
